

Objective 32: Reduce cigarette smoking among adults

Cigarette smoking is the cause of almost 6,800 Maryland deaths each year and 150,000 people suffer from diseases/cancers caused by cigarette smoking.

 Update Summary: Pending

Statistics and Goals

Measure: Percentage of adults who currently smoke

National Data Source: Healthy People 2020, CDC National Health Interview Survey (NHIS)

Maryland Data Source: Maryland DHMH Behavioral Risk Factor Surveillance System (BRFSS)

National Baseline	Maryland SHIP	Year	Total	Asian	Black	Hispanic	White	SHIP 2014 Target
20.6 (2008)	Baseline	2010	15.2	4.4	17.8	7.8	15.0	14.4

Objective 32: Reduce cigarette smoking among adults

Data Details	
<u>National Data</u>	
Source	CDC National Health Interview Survey
Year	2008
<u>Maryland Data</u>	
Source	Maryland DHMH Behavioral Risk Factor Surveillance System (BRFSS)
Year	
Baseline	2010
Update	---
Calculation	
Numerator	Number of persons who reported currently smoking cigarettes some days or every day.
Denominator	Number of persons (population)
Population source	Maryland DHMH Behavioral Risk Factor Surveillance System (BRFSS)
Single year method	$(x/y) \times 100$
Combined year method	Total number of current smokers divided by total population
<u>Notes</u>	
Race/ethnicity	Race and Hispanic origin are reported separately. Data for persons of Hispanic origin are included in the data for each race group according to self-reported race.
Censoring	---
Origin	Requested and received from DHMH Center for Chronic Disease Prevention and Control, Sara Barra, September 2011
